Anurag Rajak

SOFTWARE ENGINEER

EMAIL. : anuragrajak7974@gmail.com || +91-6268311161 || LINKED-IN : anurag-rajak-it || GITHUB: anuragraja

Career Objective

Aspiring Software Engineer with a strong foundation in full-stack development, data structures, algorithms, and database management. Experienced in building scalable web applications and AI-powered solutions using modern technologies. Eager to apply technical skills and problem-solving abilities to develop innovative, efficient, and user-centric software solutions while continuously learning and growing in a collaborative environment.

Education

Bansal Institute of Science & Technology Bhopal (Madhya Pradesh), India 2024 - 2028 • Branch-IT | CGPA: 7.49 till 4th Semester.

Holy Child Convent Higher Secondary School, Bamitha(Madhya Pradesh), India • MP-BOARD (Class XII): 76%

Holy Child Convent Higher Secondary School, Bamitha(Madhya Pradesh), India • MP-BOARD(Class X): 71%

Skills

Programming Languages : C, C++,Python.
Web Development : HTML, CSS, JavaScript, Node.js, Express.js.
Frameworks & Libraries : React.js, Next.js, Tailwind CSS.
Databases : SQL,MongoDB.
Core Concepts : DSA, Operating System, DBMS.
Developer Tools : Git, GitHub, Postman.
Cloud & DevOps : AWS, Docker, Linux, Git, GitHub, CI/CD, Vercel
Interpersonal Skills : Communication, Teamwork, Leadership, Time Management. Having a good understanding of Object Oriented Programming.

Projects

SmartWasteX — AI-Powered Smart Waste Management & Recycling Ecosystem | Live

- **Developed an AI-powered waste management platform** with real-time complaint tracking, GPS-based location detection, automated worker assignment, and role-based dashboards using React.js, Node.js, and MongoDB, and Firebase. enabling streamlined waste reporting and operational management

SamadhanAI — AI-Based Citizen Grievance Classification & Smart Routing System | Live

- **Built an AI-powered grievance classification and routing platform using Python, LLM APIs, and REST services,** implementing automated complaint categorization, priority detection, and intelligent department routing.

SettleMate — Smart Roommate Expense Sharing Platform | Live

- **Engineered an automated expense-sharing platform** that distributes shared costs, tracks individual contributions, and manages roommate settlements, simplifying recurring group expenses and financial reconciliation.

College ERP Management System — Full-Stack ERP Platform | Live Project

- **Engineered and deployed a full-stack College ERP platform** using Next.js, Node.js, MongoDB Atlas, and JWT, implementing role-based authentication, fee/admission management, student and staff modules, automated email workflows, and Google Drive-based cloud backups. Technologies: Next.js, React, Node.js, MongoDB, JWT, Google OAuth, Google Drive API, Gmail SMTP, Vercel

Internships

Programming Intern Mar 2026 – Apr 2026 CodeAlpha — Remote

- **Developed C++ programming projects** applying Object-Oriented Programming concepts including classes, objects, inheritance, functions, and STL, strengthening software design and problem-solving capabilities.
- **Applied debugging, algorithmic thinking, and code optimization techniques** to develop efficient and maintainable solutions during the virtual C++ programming internship.

Certifications

• AWS Cloud Certified – Certification in AWS Cloud Services.
• C & C++ Programming Certifications – Certification in C and C++ Programming.
• NPTEL Certification – Fundamentals of Object-Oriented Programming.
• Java Certification – Cisco – Certification in Java Programming from Cisco.
